

A'sem Mohammad Shawkat Al-Zaghal

Junior Software Engineer

mr.aseMZ14@gmail.com • +962 79720 9466 • [LinkedIn](#) • [GitHub](#) • [Portfolio](#) • Amman, Jordan

PROFESSIONAL SUMMARY

Recent Software Engineering graduate with solid hands-on experience building full-stack web and mobile applications. Proficient in Java, PHP, Python, and JavaScript, with practical exposure to REST API design, database integration, and clean architecture principles. Demonstrated ability to deliver end-to-end projects independently — from requirements analysis through deployment-ready code. Co-author of a peer-reviewed AI ethics publication. Currently pursuing advanced JavaScript and full-stack training. Eager to contribute to a professional engineering team as a Junior Developer.

TECHNICAL SKILLS

Languages	PHP, JavaScript, Java, Python
Web Technologies	HTML5, CSS3, Bootstrap
Frameworks & Tools	Laravel, ReactJS, React Native FastAPI, Flutter
Databases	MySQL
Developer Tools	Git, GitHub
Concepts	OOP, REST APIs, MVC, CRUD Operations, Clean Architecture

PROJECTS

Boutique — Multi-Vendor E-Commerce Platform | *Laravel · React · React Native · MySQL*

Live Website: <https://boutique-xi-nine.vercel.app/> - Mobile App: [Here](#) - GitHub:

<https://github.com/MrAsemZ/boutique>

- Architected and built a full-stack, multi-vendor e-commerce clothing platform for the Jordanian market as a monorepo (REST API, web client, mobile app), with Arabic-first bilingual (AR/EN) support and full RTL handling.
- **API (Laravel):** Designed a complete RESTful backend covering authentication, vendor/admin roles, product catalog with variants, cart, checkout, and orders — validated by an 80-test Postman suite and a security review pass.
- **Web (React + Vite):** Developed the full storefront and dashboards — home, shop, product detail, cart, checkout, order history, customer account, vendor dashboard, and admin dashboard — with role-based route guards and persisted auth state.
- **Mobile (React Native / Expo):** Building a cross-platform mobile client consuming the same API, reusing the bilingual and authentication logic from the web layer.
- Implemented localized currency formatting (إ.د 25.00 / JOD 25.00) and a CliQ + Cash-on-Delivery payment flow tailored to local market needs.
- Seeded the catalog with 50 products and 765 variants; deployed the API to Railway and the web client to Vercel with environment-based CORS configuration.

WISE Guide | *Python · FastAPI · Flutter · MySQL*

GitHub: <https://github.com/MrAsemZ/WISE-Guide> (source code available)

- Designed and developed a university guidance system enabling students to navigate campus services, schedules, and academic resources.
- Built a cross-platform mobile frontend using Flutter with a modern, user-centered UI.
- Implemented a RESTful backend with Python (FastAPI), handling authentication, business logic, and API routing.
- Designed and integrated a MySQL database schema for users, schedules, and peer help requests.
- Delivered key features: interactive campus map, peer-to-peer voluntary help module, and an integrated AI chatbot.
- Followed clean architecture and modular design throughout the full software development lifecycle (capstone project).

WMS — Warehouse Management System | *PHP · MySQL · Bootstrap*

GitHub: <https://github.com/MrAsemZ/WMS> (source code available)

- Developed a full-featured warehouse management web application for managing goods, inventory, and import/export operations.
- Implemented secure session-based authentication and role-based access control.
- Built full CRUD functionality for products, categories, suppliers, and warehouse transactions using prepared statements.
- Created an admin dashboard surfacing real-time stock levels, total cost, and inventory quantity.
- Designed a fully responsive UI with HTML, CSS, and JavaScript for smooth cross-device interaction.

GreenLeaf — E-Commerce Website | *PHP · JavaScript · HTML · CSS*

GitHub: <https://github.com/MrAsemZ/GreenLeaf> (source code available)

- Built a fully functional e-commerce website for browsing, selecting, and purchasing plants.
- Implemented the entire shopping cart flow in vanilla JavaScript — product selection, quantity management, and checkout.
- Designed and coded the complete UI from scratch, prioritizing usability and clean visual layout.

EDUCATION

B.Sc. in Software Engineering — World Islamic Sciences and Education University (W.I.S.E),
Amman, Jordan

Graduated: September 2025

CERTIFICATIONS & COURSES

Claude Code 101

Anthropic · 05/2026

Claude 101

Anthropic · 05/2026

JavaScript Development Course

BeProgrammer · 42 training hours · 02/2026 – 05/2026

Comprehensive Full-Stack Web Development Course

BeProgrammer · 128 training hours · 03/2025 – 02/2026 (Completed)

ICDL Certificate

Science Caravan Academy · 24 training hours · 01/2023

RESEARCH & PUBLICATIONS

The Role of Artificial Intelligence in Scientific Research and Ethics: A Contemporary Analytical Study

Co-Author · Published in *Jerash University Journal*, Issue 25, pp. 145–167, December 2025

- Reviewed and analyzed 40 open-source scientific papers indexed in Scopus (2021–2025).
- Investigated the impact of AI tools on research efficiency, literature review automation, and data analysis.
- Evaluated ethical issues including bias, privacy, transparency, authorship, and accountability in Alassisted research.
- Contributed to proposing a 5-axis institutional policy framework covering disclosure, governance, training, and ethical publishing.
